ONE MORE ALTA RESULT OF LOWER

Alta Consolidated Company Is Organized by the Former Columbus Interests.

COMPANY LAUNCHED HERE ON WEDNESDAY

Modern Machinery Will Be Secured and Work Begun

tained in the treasury 200,000 shares of stock, 100,000 shares of which have been taken by the interests behind the com-pany and their friends at 20 cents a

Associated with Mr. Jacobson are sev

Associated with Mr. Jacobson are several of the men who have been connected with the Columbus companies of Alta during the past several years. Tony Jacobson is president: J. H. Winwood, the engineer, is vice president; Val S. Snow is secretary and treasurer. A. O. Jacobson and Hans Wonder are the remaining directors. Mr. Wonder will be the mine foreman and A. O. Jacobson the superintendent of the company.

The group consists of eleven claims, many of which are patented, located between the old Emma and the City Rocks properties, in the upper part of the district. Mr. Jacobson, with his years of experience at Alfa, has been in a position to select the best looking ground in that one-time abandoned district, and he pronounces the Alfa Consolidated one of the best there. Ore is showing in numerous places already, and the surface indications are ideal in cevry particular. The company will secure machinery immediately, putting the operations under way with the most modern equipment procurable.

tions under way with the most modern equipment procurable.

Work has been under way by these interests for the past six months, and to date there have been about 5000 feet of tunnels, drifts, raises and winzes driven, proving a perfect index to the vein system of the property. The company is completely financed, and begins its carrier with everything in its favor.

GHOSTLY VISITORS ARE TROUBLING THE MINERS

local mine manager was chuckling dresday over the report from the su-intendent that there had been some unge noise heard underground, and t some of the miners were wondering here was a ghost making its presence rd but not seen. Being in a reminat mood, he recalled the fact that ing his experience he had encountered serous instances of superstition among men, many of whom have seen each lety of ghost from a Chinaman to a le pig.

the men, many of whom have seen each variety of ghost from a Chinaman to a white pig.

There is an air of mystery about underground mine workings always felt by the mowle, and it frequently is never solved by the most experienced of miners. All old mines have their "Dead Man's Drift," some dark corner deep down where a fatal accident has occurred, and where the spirit of the departed sometimes can be found. Strong men who face death in horrible forms at any hour of their work without flinching never pass these tragic points without the hastening of steps sometimes running, with hair and buckbone creepy said chilly.

"I remember that we were taking a dead man down the canyon from our mine," said one manager yesterday, "and through an accident the box was thrown some distance, the body disappearing in some newly fallen snow. The men accompanying the body swore that the dead man had actually got to his feet and walked some distance, one even saw his footsteps, and before they could be coaxed back to recover the body they all took six-shooters along in case the dead man his footsteps, and before they could be coaxed back to recover the body they all took six-shooters along in case the dead man high try to get even for giving him the spill. I believe the lonely mine workings, the many miles of dark, abandoned the spill. I believe the lonely mine workings, the many miles of dark, abandoned the spill. I believe the lonely mine workings, the many a man otherwise strong and coul of nerve.

"I was frightened stiff once myself. Years ago I was working all alone on the 800 level of the old Eclipse mine and on night shift. Far back of me was a trapdoor, a part of the ventilating system of the mine, and once in a while I heard some one pounding on this door. It soon had me huffaloed, and I knew it was up to me to either quit or solve the mystery. I carefully walked forward, leaving a bright trail of candles behind me in case a hasty retreat became necessary.

"The closer I got to that trap door the louder the noise became, a

TINTIC MINERS DESIRE LABOR DAY VACATION

Harry S. Joseph, secretary of the Tin-tic Mine Operators association, was in receipt on Wednesday of a communica-tion from the Tintic Miners union, dis-trict No. 151, asking that steps be taken to secure a two days vacation for the men on Labor day. Mr. Joseph stated vestorday that he would likely reply to the effect that this is hardly a matter that the association can handle properly, and that the question would be up to each company to determine for itself.

Our esteemed friend, Colonel E. S. Ferry rises to remark that "Results are what we hope for and consequences are what we get."

Which, coming during the hot weather, is pretty good for the colonel.

(CRITCHLOW, FISCHER & Cable Address "Wesfuco"

The regular quarterly dividend of the international Smelling and Refining company was declared Wednesday, payable September 1, ex-dividend, August 19.

General Manager Bemis, of the Union Chief company, reported yesterday that all the new equipment was nearly set, and operations along the wide scale now possible would be started before the end of the week. Phones 719. 73 Main Street.

PRICED RED METAL

Original Porphyry Propositions.

ORE GOING UP AND er situation, Hayden, Stone & Company how that during 1910 thirty producers show that during 1910 thirty producers had an output of \$37,948,800 pounds of copper, for which they received the sum of \$118,417,000, or 12.5 cents per pound. The cost of production is given at \$35,680,000, leaving a net profit of \$32,737,000. In other words, the companies secured a profit of less than 40 per cent, which is modest in view of the liquidation of this wealth.

Without Delay.

Without Delay.

Without Delay.

The organization of the Alta Consolidated Mining company was completed on Wednesday by Tony Jacobson and his associates, making this the fifth company to be formed by Mr. Jacobson in Alta during the many years he hus been connected with the rejuvenation of this famous old mining camp of the Wasatch range. The company is capitalized for \$300,000, divided into 200,000 shares of \$300,000, divided into 200,000 shares of the average cost of the other companies included was about ten cents a pound. Five companies confidence in the treasury 200,000 shares of the average cost of the other companies included was about ten cents a pound. Five companies controlled the representation of the story of the second the controlled was about ten cents a pound. Five companies included was about ten cents a pound and Nevada Consolidated.

TINTIC ISSUES WERE THE LEADERS WEDNESDAY

at an actual loss. This certainly makes a favorable exhibit for the two original porphyry propositions, the Utah Copper and Nevada Consolidated	range. On the tunnel level, he stated yester-
TINTIC ISSUES WERE THE LEADERS WEDNESDAY There was considerable activity in the lower pelced Tintic issues Wednesday on the local exchange, and Nevada Hills presented somewhat of a feature character in the quotation column, without any sales at the advanced bids. Sales during the day totaled 78,580 shares of stock, the market value of which was \$8779.85. The following were the closing unlisted and listed stock transactions:	grade ore each pound of it being of fine

took advantage of the visit at this time

to give the surface a close examination,

brokers, furnish the following, received over their private wire yesterday afternoon:

Logan & Bryan, New York.—Today's action of the list was another repetition of what we have been having recently in advancing market in the face of London weakness on the European situation and other pessimistic news. The coalers to which we have been calling attention for some time, were the most active leaders, and we still feel that certain matters will soon come to a head in Reading to bring about higher prices for that issue. Union Pacific and other good grangers continue to display considerable strength, despite the attacks of those working for lower levels.

We still feel that this market wants to do better, and considering all arguments that have been used, such as crop damage reports. European friction and political meddling, that the security market has given a good account of itself and should do better. We continue to feel very friendly to the Eries and to Southern Raliway issues.

Paine, Webber & Co., Boston.—After a slight weakness near the opening the whole list showed a fair rally. The volume of transactions was as small as ever and showed that the public has no interest either to buy or sell at present time. Of the mining stocks. Niplssing was the strongest, rallying to \$3, and East Butte advanced fractionally to 14½, with no stock offered less than ½. United Shoe Machinery was weak on account of federal investigation. American Zinc was active on the advance. We see no prospect of any material change at present.

Gallagher, New York—Very good buying in Nevage this stock to stock of the stock of the stock to stock of the stock of the stock the stock to stock of the s pect of any material change at present.
Gallagher, New York —Very good buying in Nevada Hills advanced the stock to
4 1-16. There was very little trading in
the coppers, which closed unchanged.
Porcupine dull with the exception of Hollinger, which opened weak, but supporting
orders quickly railled the issue to 12.

GOLD CIRCLE CROWN WILL RESUME OPERATIONS

General Manager S. M. Levy, of the Gold Circle Crown, announced on Wednesday that this Sait Lake owned property of the Gold Circle. Nevada, mining district would be placed upon the active operating list in the very near future. For some time past the company has had a small force employed in cleaning out all the old workings, easing timbers and getting everything in shape for work. In the early days of the Gold Circle Crown property a considerable amount of development work was done. This new work will be directed at first to sending the west tunnel to connect with the ore shoots known to exist beyond. This west tunnel is new 500 feet in the hill, ahead of the face being four separate shafts all in gold ore. When this west tunnel work reaches the logical point the management will begin making mill plans.

There are two other tunnels on the property, the east upper and the east lower funnels. The lower tunnel is in about 1400 feet, and three shoots of sulphide ore have been cut in this work and one oxidized shoot was followed until it turned into the sulphide form. The upper east tunnel is 500 feet long, and a sufficient tonnage is almost demonstrated throughout the mine at present to justify the erection of a mill.

The Rew property is located almost adjoining the Gold Circle Crown and they are on parallel veins. The Rex is employing thirty men and the character of results being gained is fashioned very much after the original expectations which made the Gold Circle district at one time the most-talked-of mining camp of the many of the Sagebrush stale.

The Gold Circle Crown claims are all patented.

ROUND MOUNTAIN IS TREATING MUCH ORE

Good Showing Made by the Two President MacVichie Is Back New Equipment Gives Very Satisfactory Service From Mine Reports.

> f the Round Mountain Mining company DOWN WITH STRENGTH Company Preparing to Send

Lewis D. Gordon, one of the directors of the Round Mountain Mining company, has received a communication from the mine showing that the present mine and mill conditions are extremely gratifying the company now operating with the advantage of the increased mill expactly. A portion of this letter here follows:

"I am much pleased with general mine conditions, and particularly pleased with edr new mill equipment, and the results we are getting. The ten stamps were put into commission on the 5th, and with the exception of a few hours, have been runcing steadily since that time. Immediately after the stamps began dropping, the Huntingtons were hung up for repairs. The No. 1 Huntington went into commission on the 10th, after having been off for five days. No. 2 Huntington went into commission on the 16th, and the Nissen stamp repairs were about completed when I left the mine on the 17th, and they are, no doubt, dropping by this time

"We had only two full days' run on the two Huntingtons, and the ten stamps, but judging from the fornage put through during that time we will, when the Nissens are put into commission, crush between 170 and 180 tons per day. I think it perfectly safe to say that the mill is good for 5000 tons per month."

The letter also states that the placer production for the month of June at Manhattan was \$15,000 and the limited water placer operations in that district. In speaking about the June operations, the letter states that the total cost per ton of mining and milling was \$5,2852, in which is included an expense of new equipment installation which need not appear hereafter, and the management makes a liberal addition on the account of depreciation.

WHERE COPPER EXPORTED IS ABSORBED ABROAD

Thompson Towle & Co. have issued the following bulletin:
